The Safe Way to Fly with Kids: CARES Child Aviation Restraint; GoGo Kidz Travelmate and GoGo Kidz Car Seat Protector Bag

November 25th, 2008

The holiday season is just around the corner. Visions (aka nightmares) of crowded airports, wailing children and mountains of luggage are already occurring far too often in our heads! [Wee Travel Baby Equipment Rentals](#) both sells and rents a few items that will surely make traveling with your young ones easier and safer.

The [CARES Child Aviation Restraint](#) attaches directly to the back of the airplane seat and augments the regular airplane seat belt by restraining the torso to the seat and not just the waist. It's FAA approved, and is the only alternative to a carseat permitted on planes. Wee Travel rents it for \$5/day and \$25/week or you can purchase it for \$85 plus shipping and tax.
