CARES

Our Rating 

Product:

CARES

Company:

Kids Fly Safe

>>> CARES carries a 22 - 44 lb. Size recommendation, up to 40" tall, ages 1 yr - 4 yrs.

>>> CARES is manufactured by AmSafe Aviation, the leading manufacturer of aviation seatbelts and pilot restraints.

>>> CARES is the only Child Safety Device certified by the FAA as an alternative to a car seat.

Flying with children can be difficult at the best of times. Carrying a car seat along, to ensure your child is safely restrained ranks right up there with self imposed torture. However, placing a small child in a plane seat with merely a seatbelt in place is not only uncomfortable for them, it does no good in keeping them safe.

CARES offers a handy and practical solution, by offering a safe and FAA approved safety restraint system that is not only easy to use, it is easy to carry with you. CARES works along with the seatbelt in place on the plane, to ensure both safety and comfort for your child.

Airlines now require that all children over the age of two be ticketed and in their own seat. Usually this means parents have to carry on a massive car seat, just to have a safe place for their little one to sit. Not any more. Now you can check your car seat in with your luggage (if you need it at the other end of the trip) and only bring CARES on the plane to secure your wee one. This makes your load much lighter and your trip much easier and carefree. Your child will be as safe in CARES as they would be in a car seat, for the plane ride.

Please note: this is not a device to be used in a motor vehicle - only airplanes.

Because this device is approved by the FAA it may be used on any airline, anywhere.

If traveling with a child has seemed like a burden up till now, please know that CARES will help to make your path a little easier and your load a little lighter. Now you can travel with ease and not have to worry about getting from point A to point B safely.

RATINGS EXPLAINED: - perfect score = 5

1. Price is within reason for the product (1 pt)

2. The product does what it claims (1 pt)

3. Suited for recommended age (1 pt)

4. Quality manufacturing (1 pt)

5. Instructions are clear and easy to follow (1 pt)

5 = PERFECT | 4 = GOOD | 3 = OKAY | 2, 1, 0 = rejected
