

KIDS FLY SAFE

When you're flying, leave the car seat where it belongs. Check it in as luggage and bring **CARES** on board—the only harness-type child safety device certified by the Federal Aviation Administration (FAA). Designed by Grandma Louise Stoll and manufactured by AmSafe Aviation, CARES is the ultimate travel solution, making flying safe a hassle-free experience. It's portable, adjustable, and so easy to install, that it doesn't matter whether you're flying economy, or first. CARES can be used for children ages 1 to 4 years who weigh between 22 and 44 pounds. You can use it aboard any US carrier, and it has also been certified by Australia and New Zealand. (\$74.95, kidsflysafe.com)
